

HEATRAESADIA

SMARTER | CLEANER | WARMER

VENTED POINT-OF-USE
HOT WATER

PRODUCT RANGE

Streamline, Express,
UTC 99, B3M,
C3M & FBM.

Electric vented hot
water solutions for
commercial buildings.

Many different types of commercial and industrial organisations need a reliable supply of hot water.

Typical applications are:

- Holiday lets
- Student accommodation
- Office buildings
- Washrooms
- Garages
- Workshops / studios
- Converted outbuildings
- Hairdressers
- Dental, medical and veterinary practices
- Cafés to commercial kitchens.

Our team at Heatrae Sadia have designed a range of vented electric water heaters around our customers' diverse and practical commercial needs.

These are also commonly known as 'open-outlet' or 'point of use' water heaters.

UK designed, engineered and manufactured, our models come in an array of shapes, sizes and specifications with parts and labour warranties* and industry approvals.

**Visit heatraesadia.com for full warranty terms and conditions.*

STREAMLINE

our most flexible and modern vented
water heater.

Designed in under-sink and over-sink models there are two size and two rating options. Streamline is slender in its design and can be customised with a choice of over fifteen tap and spout solutions – available in our accessories section on page 13.

Ideal for situations where small amounts of hot water are needed, such as single washrooms and small office kitchens.

Streamline comes with a 2 year warranty.*

**Visit heatraesadia.com for full warranty terms and conditions.*

EXPRESS

More traditional in its design, Express is our tried and tested original hot water heater. This water heater has been much loved by our customers over the years, so much so that they want it time and again when updating or installing in new properties.

Adaptable to under-sink and over-sink installation Express has a tough metal case, making it easily capable of withstanding the rigours of daily use.

Express is available in two sizes and two ratings and can be fitted with a telescopic spout for over-sink use or with taps when installed under sink.

Express comes with a 2 year warranty.*

**Please visit heatraesadia.com for details of full product warranties.*

EXPRESS

UTC 99

We know that under-sink space is often confined, which is why we designed the UTC. The UTC is narrower than the Streamline and much taller. This lends itself well to under-sink space that needs to be shared with other items. The taller design allows for a larger capacity without loss in performance.

UTC is ideal for smaller offices and single washrooms where there is only a mains water and electricity supply.

UTC comes with a 2 year warranty.*

**Please visit heatraesadia.com for details of full product warranties.*

UTC 99

B3M / C3M

B3M / C3M are our two largest capacity vented water heaters. At 30L and 50L they have been designed to service the most demanding of applications, such as commercial kitchens where large amounts of hot water is needed for prepping and dishwashing.

Available in the over-sink option only, the tough metal case is designed to withstand the rigours of daily use.

Both B3M and C3M come with a 2 year warranty.*

**Please visit heatraesadia.com for details of full product warranties.*

B3M

FBM

FBM is the solution if you're looking for a cistern-type water heater that services multiple outlets.

Gravity-fed, FBM needs to be installed at least 1.2m above the highest draw-off point. Paired with our CT1 thermostatic blending valve the stored hot water can be blended with cold water to deliver a preset outlet temperature.

Ideal applications are washrooms with multiple sinks or commercial kitchens, where there is room to install the heater in a room above the outlet point.

FBM comes in four sizes and can service between 2-8 basins depending on the model you choose.*

FBM comes with a 5 year warranty.**

**Also depends on demand, pipe run, pipe diameter and head of water.*

***Please visit heatraesadia.com for details of full product warranties*
