### HIGH SPEED DRYING

A series of high speed jets from three separate air outlets dry your hands quickly and thoroughly in 10 seconds.

### INTELLIGENT HEATING

This dryer automatically adjusts the heater depending on the ambient temperature of the air surrounding the dryer. This means that in cold temperatures you have a comfortable hand drying experience and in the warmer weather you can reduce your energy consumption and save money.

### ADJUSTABLE AIRSPEED

You can reduce noise levels or keep the machine at maximum efficiency.

### HYGIENIC

A high grade HEPA filter ensures clean air is used to dry your

hands. The machine also has an antibacterial coating to help keep the surfaces hygienic & bacteria free.

### NO DRIPS

Water blown from the hands is absorbed by a ceramic plate where it continuously evaporates. During heavy usage, when the ceramic plate is saturated excess water then flows to a water tank in the base of the dryer.

### FRESH SCENT

This hand dryer gives you the option to use scented gel blocks which fragrance the air, moisturise your hands and sanitise the dryer.

### BLUE LED

A blue LED light guides the user to the airflow and adds a cool modern touch.

### BD988 Technical Specifications

Voltage	220-240V, 500-1450W
Motor Type	Brush, 500 - 900W 11000 - 22000 rpm
Air Speed	90-135 m/s
Air Temp.	35-40°C (Ambient Room Temp = 20°C)
Decibel Rating	65-78 dB @ 1m
Drying Time	5-10 seconds
Sensor Range	120±10 mm
Protection Level	IPX4
Isolation	Class I
Water Tank	YES
Air Filter	High grade HEPA
Net Weight	8Kg
Unit Size (mm)	W318 x H618 x D185
Finish	ABS Plastic Silver/White
