

# Buffalo 10Ltr Autofill Water Boiler with Filtration

If you need a reliable source of piping hot filtered water on tap, the Buffalo Automatic Water Boiler is the ideal front of house appliance. Able to dispense up to 30 litres (around 130 cups of tea) every hour, the boiler helps you to produce great quality tea and other hot drinks thanks to an easily-changeable water filter. The front-mounted digital display provides effective feedback about the status of the machine, including whether it needs a filter change or descale routine. Easy to use, clean and maintain. Supplied with pre-installed filter.

## Features and Benefits:

- Precise electronic controller with on/off switch and filter life indicator
- Adjustable water temperature from 70-96°C
- Powerful 3kW long life incolloy heating element
- Built in filtration system with easy change filter improves water quality and reduces scale build up
- Supplied with pre-installed filter as standard
- 220mm tap height
- Dual function tap allows user to switch between constant and controlled flow
